

### Extruded Printed Circuit Board Tray

The ET series of extruded printed circuit board trays can accommodate circuit boards in widths of 2.56" / 2.83" / 3.94" / 4.21".

The ET series of trays can either be mounted to a standard DIN rail using the mounting feet or directly on a back panel using the panel mounting ears.

Trays can be ordered as raw extrusion, which can be cut to length. Alternately, ASI's value-added department can cut trays to specified lengths and can even provide complete tray kits.
