Product Description

The Smart DigiPyro® family provides for a complete motion detector solution, with all electronic circuitry built-into the Detector housing. Only power supply and power-switching components need to be added to make the entire motion switch, a timer is included. The series has versions which can include ambient light level and sensitivity adjustments.

Two versions are offered: PYD 1098 Dual Element configuration and for higher spatial resolution the Quad Element with 4 square elements. Parameters as sensitivity and Light level are internally set to default values and disabled.
