

A35 GPS Asset Location Tracker

A35 GPS Vehicle and Asset Tracker

Key Features

- Battery operated location tracking device
- GPS and Google Map based asset tracking in real time
- Rechargeable battery for up to 25 days of operation
- IP66 weather-proof
- Suitable for vehicle, package, asset tracking with a simple app click
- LTE-4G and GPRS SIM card based
- Supported by cloud-based management platform
- Optional vehicle 12VDC charger
- Remote control capability

A35 is a wireless, real time and rechargeable battery-operated location tracking device designed for vehicle, package and asset location detection and tracking based on the GPS system. The system uses the state-of-the-art mobile wireless technologies and cloud-based software for ease of activation, free of maintenance and system upgrade. It is a must-to-have solution for valuable-asset locating and tracking during shipping, in the event of lost as well as during normal transit.

Archimedes Controls specializes wireless technologies, sensors and cloud development for IoT monitoring and smart city applications. Its state-of-the-art designs are specially developed for low power and long-distance tracking and monitoring for many industries. A35 is one of the latest real time wireless monitoring innovations powered by its unique sensing devices supported by a global cloud platform and an app which offers a true plug and play, maintenance free management for various environment and conditions.

- 1) **Easy to Use** - Plug and play, no installation is needed. 100% wireless with rechargeable batteries.
- 2) **Automatically Tracking Whether Stationary or In Motion** – The device obtains GPS location data every 10-60 sec or on-demand. It sends its ID number along with the GPS data and battery status through a mobile network to the cloud-based management platform or a mobile phone as text messages.
- 3) **Cloud App** – A cloud-based management platform for managing all the devices in use. The management includes battery conditions as well.
- 4) **Low Power Consumption and Maintenance Free** – Powered by low power radio transmitter and high reliable electronics.
- 5) **Asset Tracking** – Tracks package or anything where A35 is resided.

Technical Specifications

Working Power: Built-in rechargeable lithium battery
 GPS Data Frequency: every 10-60 sec continuously or on demand
 Google Map Display: Near real time when mobile data received
 Network Connection: LTE-4G and GPRS
 Operating Temperature/Humidity: -20°C to 60°C/0 to 90% RH
 Dimensions/Weight: 3.0"x1.8"x0.9"/3.5 oz.

Ordering Info

A35: GPS location tracker, including a USB-A to Micro-USB charging cable

A35-12VDC: 12VDC to Micro-USB charger for vehicles
